

Introduction

This is a poster box

- Use \LaTeX code as usual
- Write stuff
- Give me feedback if you don't like this.
- You can also let me know if you do like it.

A Box

Another poster box. Bottomaligned with the introduction box.

A wide Box

A third posterbox
Use the column, row, span, above, below and bottomaligned keys to position boxes.

Outlook

And yet anotherone, stretching down to the foot.
I could add some usefull how-to-use guide here, but than this would be more like an options.tex and less an example. So meh.
